VACCEPTABLE INJURIES: INCREASING CHILDHOOD DISEASES DEVELOPMENTAL DISORDERS (PAPERBACK)

DOWNLOAD

Markus Heinze, United States, 2012. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Using a highly personal approach, VACceptable Injuries: Increasing Childhood Diseases Developmental Disorders educates parents about the scientifically-documented risks involved in vaccination. Author Markus Heinze speaks from traumatic personal experience, as the father of a vaccine-injured child. His daughter developed type 1 diabetes, an autoimmune disease, at the age of three-and-a-half-years old. After much research in scientific journals and federal databases, he has concluded that a Hepatitis B vaccine, administered shortly after her birth, is to blame. You don t have to play the lottery with your children s life, hoping nothing goes wrong when they are injected with the potentially lethal neurotoxins routinely included in vaccines, writes Heinze. This book provides you with a review of the medical and scientific literature surrounding vaccination risks as well as personal stories from those whose lives have been touched by vaccine-related injuries. According to the author s research, tens of thousands of children are severely injured, or in some cases, killed by their exposure to vaccines. Targeting parents and health professionals, VACceptable Injuries draws on verifiable databases and peer-reviewed research to make its controversial claims. Heinze is aware that many will try to discredit his work, given that he is not a doctor or a scientist. With a bachelor s degree in psychology and a master s degree in education, he is equipped to analyze scientific claims of experienced researchers who have been investigating the connections and correlations between vaccinations and the development of childhood autoimmune disorders, such as type-1 diabetes. Through his academic research, he has discovered that vaccines pose an ongoing danger to our children. Heinze s book is a good choice read before doctors and nurses approach your family and newborn...
