Forgotten Books, 2018. Hardback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from **The Future of Antarctic Research: Hearing Before the Subcommittee on Basic Research of the Committee on Science, U. S. House of Representatives, One Hundred Fourth Congress, Second Session, July 23, 1996** All visitors to Antarctica come to know it as a unique region of Earth. Antarctica is defined by the Antarctic Treaty as the area south of 60 degrees south latitude. It contains 10 percent of Earth's land mass (about times the area of the us), 6 percent of the world's oceans, and its ice represents 70 percent of the earth's fresh water. Antarctica can be described in superlatives as the coldest, windiest, highest, and driest of Earth's continents. Thick continental ice typically some three kilometers deep covers 98 percent of the land; the remaining 2 percent is barren rock. this topology Contrasts with North Holar regions. The Arctic Ocean is slightly larger than the Antarctic continent, but the Arctic surface is about three meters of moving ice on top of sea water. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
